

# Planning Information Systems

## CRP 457 Fall 2002

**YOUR ABOVE AVERAGE GIS COURSE!**

**CRP 457 CALL #11856**  
**TUESDAY 5:00 TO 7:00 AND**  
**THURSDAY 5:00-8:00**  
**BUILDING 21 ROOM 236**

### **WHAT THIS CLASS CAN TEACH YOU**

- How and why PROFESSIONALS use GIS
- Greater understanding of ESRI ArcView 3.2
- Understanding of data collection, input, manipulation and analysis
- How to graphically present your analysis results
- What public/private decision makers want to see

This course will provide you with impressive projects you can present to potential employers and add some quality girth to your portfolio!

### **PROJECT ASSIGNMENTS INCLUDE:**

- Land Use, development and specific plans
- Endangered species/habitat protection
- Traffic analysis and land use decisions

#### **Instructor Information:**

Jeff Legato has been the GIS specialist and graphic coordinator for Crawford Multari & Clark Associates since 1996. His experience in collecting, analyzing and presenting data is extensive.

*This is not an entry level course. Students enrolling should at least be familiar with some basic GIS operations or be highly computer literate.*
